

Secure, Energy-Efficient Linux Capabilities for Smart Home and Industrial Automation

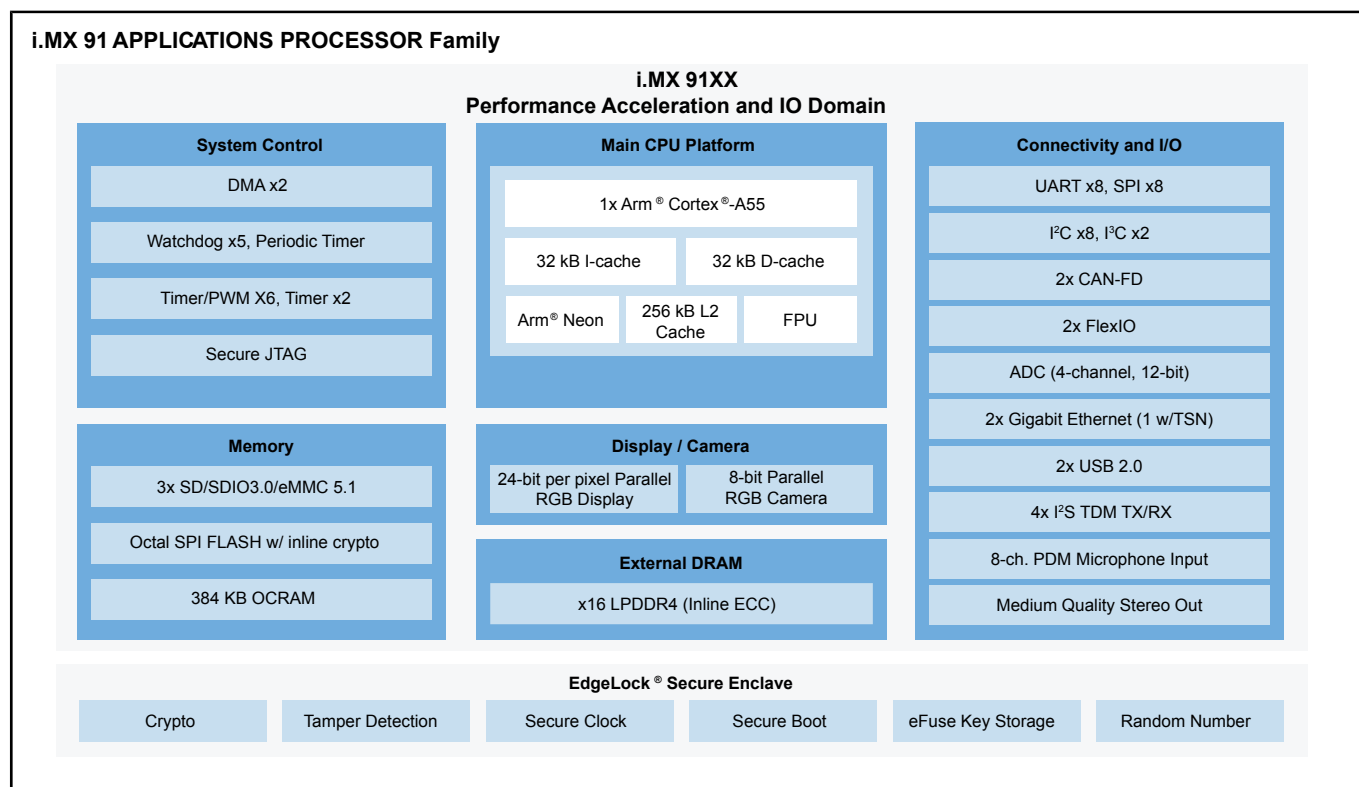

i.MX91

Active

Last Updated: Dec 22, 2025

The i.MX 91 family of applications processors enables smart home controllers, home entertainment, connected appliances, [industrial automation](#) and [medical platforms](#) applications. Powered by an Arm® Cortex-A55, i.MX 91 MPUs integrate a single chip PMIC, [PF9453](#), to enable the rapid creation of Linux-based IoT edge devices. Emerging protocols, such as Matter® for the smart home or the ISO 15118-20 standard for electric vehicle (EV) chargers, create inflection points for new product categories across IoT and industrial markets.
