

Multimedia Applications Processors – .NET Micro Framework applications, Arm9™ Core

i.MXS

Not Recommended for New Designs

This page contains information on a product that is not recommended for new designs.

Last Updated: Apr 8, 2022

The i.MXS applications processor is a leading solution for .NET Micro Framework applications such as remote controls, home automation systems, point-of-sale terminals, HMI panels and other devices requiring a very small footprint. The processor features an Arm920T™ core operating at 100 MHz, an LCD controller, and power-saving modes to provide very high performance while lowering the overall power budget and system cost.

Designers seeking a comprehensive development platform for .NET Micro Framework applications need look no further. NXP® partner Device Solutions offers the Tahoe development system, powered by the i.MXS processor, to get you from concept to production quickly.
