TARGET APPLICATIONS
- Automotive infotainment—instrument cluster, head unit, heads-up display (HUD), rear seat entertainment and full digital electronic cockpit (eCockpit)
- Advanced industrial human machine interface (HMI) and control
- Single-board computers
- Home/Building

MULTIPLE SYSTEMS, ONE PROCESSOR
- Easily combine multiple systems into one
  Build multiple platforms with multiple operating systems on a single i.MX 8 processor. The i.MX 8 full-chip hardware-based virtualization, system MMU, resource partitioning and split GPU and display architecture enable faster time-to-market and lower cost than simple hypervisor techniques alone.
- Secure Your System with SECO HSM
  Top-of-the-line security via the SECO (security controller) with an isolated, dedicated Hardware Security Module (HSM) to protect the system and its connections.
- Isolate key systems with on-chip hardware firewalls
  Isolate critical services such as over-the-air (OTA) upgrades by running within 16 separate run-time programmable hardware firewall domains.
- Improve your system reliability with FDSOI
  Built using 28 nm FDSOI, the i.MX 8 applications processor enables improved MTBF and decreases soft error rates due to FDSOI’s inherently high immunity to alpha particle flux.

THE NEW USER INTERACTION PARADIGM
- Create advanced vision-based HMI systems
  High-performance end-to-end vision processing for vision-based assistance, tracking and object detection.
- 360-degree expanded sight
  Utilize multi-camera input, digital stitching and VX vision extensions and provide a view from any angle.
- Multi-domain voice recognition
  Utilize the Arm® Cortex®-A72, Cortex A53 and Cortex-M4F cores as well as the HiFi 4 DSP* for advanced echo cancellation, key word detection and speech recognition for hands-off interaction.

MULTI-DISPLAY & MULTI-DOMAIN FUNCTIONALITY
- Four screens of independent content
  Develop innovative, multi-screen platforms through the ability to drive up to four 1080p screens with independent content, or a single 4K screen.
- Ensure your display stays up and correct
  SafeAssure® ASIL-B ready hardware protects critical visual information with fail-over-capable quality of service to any display.
- Offload time-critical tasks
  Utilize dual Cortex-M4F cores for time-critical tasks such as backup camera display, audio control and general system monitoring and wakeup.
THE SCALABLE PLATFORM OF CHOICE

- Comprehensive software support: Android®, Linux®, QNX, Green Hills®, DornerWorks XEN and FreeRTOS™
- Automotive, industrial, consumer qualified: Auto (-40 °C to 125 °C Tj), industrial (-40 °C to 105 °C Tj)

PIN AND POWER COMPATIBLE

Highly scalable design options allow a single platform to cover multiple products. Pin- and power-compatible package (in 0.75 pitch) allow a single PCB platform and utilize different i.MX 8 processors as product needs dictate.*

EARLY DEVELOPMENT ACCESS

The i.MX 8 multi-sensory evaluation kit (MEK) is available now to prototype i.MX 8 systems. Contact your NXP sales representative for details.

i.MX 8 FAMILY—DIFFERENTIATED FEATURES

<table>
<thead>
<tr>
<th>Feature</th>
