Democratization of Payments: How to scale payment innovation

30 years ago, we paid cash.

20 years ago, we started paying with simple credit cards.

We are now used to paying with secure contactless devices either through cards or phones and wearables. What is the next step? We might have an idea...

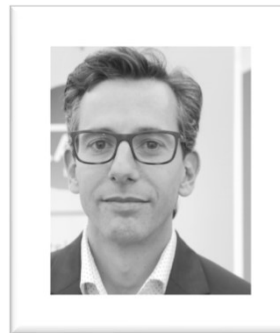

This round table leads with the latest trends of innovation in the payment card market, and how biometric smartcards can benefit the entire payment ecosystem. Find out how it affects smart card vendors, secure IC vendors, issuers, banks, financial institutions and payment networks.

Smart Home Technology: How to Enable a New Level of Convenience

Bringing solutions that listen, learn, and adapt into the places we call home for more comfort, affordability, safety, and convenience.

Households are becoming increasingly receptive to smart home technology. Greater levels of control, convenience and efficiency are resonating with consumers. Lower price points make new products more accessible.
