

Freescale MQX™ RTOS 4.1.0 TWR-K22F120M512R GA Release Notes

1 Introduction

These are the Release Notes for the K22F120M512R GA standalone package for Freescale MQX™ RTOS 4.1.0. Freescale PK22FN512VDC belongs to the Kinetis K series processor family of 32-bit microcontrollers. The software is built based on Freescale MQX RTOS version 4.1.0. It includes the full set of MQX RTOS services and a standard set of peripheral drivers. Prior installation of MQX RTOS 4.1.0 is not required to install this package.

For more information, see the *Freescale MQX™ RTOS 4.1.0 Release Notes* (MQXRN) and *Getting Started with Freescale MQX™ RTOS* (MQXGSRTOS).

Contents

1	Introduction	1

3	Installation Instructions	6
4	Other Notes	7
5	Known Issues	8

1.1 Development tools

The TWR-K22F120M512R release was tested with the following development tools:

- IAR Embedded Workbench® for ARM® Version 6.70.3
 - Support available for Kinetis ARM Cortex®-M4 devices
 - See build projects in `iar` subdirectories
- ARM-MDK - Keil μ Vision® Version 5.0
 - Support available for Kinetis ARM Cortex-M4 devices
 - See build projects in `uv4` subdirectories
- GNU Tools for ARM Embedded Processors version 4.7-2013-q3
 - Support available for Kinetis and Vybrid devices
 - Makefile build option: `TOOL=gcc_arm`
- Makefile support (mingw32-make version 3.8.2)
 - Library makefiles are located in `<MQX_library_dir>/build/<board>/make`
 - Application makefiles are located in `<example_dir>/build/make/<board>`

For instructions on setting up development tools, including installing processor support patches, see Section 4 “Other Notes”.

1.2 System requirements

The system requirements are defined by the development tool requirements. There are no special host system requirements for the Freescale MQX RTOS distribution.

1.3 Target requirements

The TWR-K22F120M package was tested with the following hardware configurations:

- TWR-K22F120M System module Rev. B with a PK22FN512VDC processor
- TWR-SER serial System module Rev. G
- TWR-SER2 serial System module Rev. D
- TWR-ELEV Primary and Secondary elevator System modules
- TWR-MEM Rev. B memory extension System module

2 Features

2.1 Key features

This package provides support for the TWR-K22F120M tower system module with a PK22FN512VDC processor and a standard set of features and example applications.

This section describes the major changes and new features implemented in this release.

- Core clock: 120 MHz (High Speed Run mode, default)
- Bus clock: 60 MHz (High Speed Run mode, default)
- BSP Timer: SysTick
- Default console: ttyb (OpenSDA)

The package supports these features:

- PSP support for the PK22FN512VDC Microcontroller
- BSP for the TWR-K22F120M tower system module with a PK22FN512VDC processor
- Standard set of I/O drivers supporting the K22F120M512R peripherals including:
 - LWGPI/O driver
 - Serial interrupt and polled driver
 - DMI SPI driver
 - I2C interrupt and polled driver
 - ADC
 - LWADC
 - Flash Driver
 - RTC Driver
 - PIT Timer
 - LPT Timer
 - RNGA
 - SAI
- USB Device, Host and OTG drivers and stacks
- Example and demo applications demonstrating the Freescale MQX RTOS, USB, RTCS, and MFS usage
- MFS file system
- RTCS library

- Shell command line interface

2.2 Limitations

This release does not support this feature:

- CodeWarrior v10

2.3 Example applications

This package contains applications demonstrating kernel, peripheral, and file system on the TWR-K22F120M Tower System kit. The applications can be found at the following locations:

- `<install_dir>/mqx/examples`: standard set of examples for kernel features and basic peripheral drivers
- `<install_dir>/usb_v2/example`: examples demonstrating USB stack features and class drivers
- `<install_dir>/mfs/examples`: example applications demonstrating the MFS file system features
- `<install_dir>/rtcs/example/shell`: examples demonstrating RTCS features. It should work with SPI-based Wi-Fi modules.

2.4 Release contents

This section provides an overview of the release content.

Deliverable	Location
MQX PSP Source Code and Examples	<code><install_dir>/mqx/...</code>
MQX PSP source code for Kinetis	<code>.../mqx/source/psp/cortex_m</code>
MQX PSP build projects	<code>.../mqx/build/<compiler>/psp_twrk22f120m/...</code>
MQX example applications	<code>.../mqx/examples/...</code>
MQX BSP Source Code	<code><install_dir>/mqx/...</code>
MQX BSP source code for TWR-K22F120Mboard	<code>.../mqx/source/bsp/twrk22f120m</code>
MQX BSP build projects	<code>.../mqx/build/<compiler>/bsp_twrk22f120m/...</code>
USB Host Drivers Source Code and Examples	<code><install_dir>/usb_v2/usb_core/host/...</code>
USB Host source code and class drivers	<code>.../usb_v2/usb_core/host/source</code>
HUB Class Driver	<code>.../usb_v2/usb_core/host/source/classes/hub</code>
Human Interface Device (HID) Class Driver	<code>.../usb_v2/usb_core/host/source/classes/hid</code>
Mass Storage (MSD) Class Driver	<code>.../usb_v2/usb_core/host/source/classes/msd</code>
Communications Device Class (CDC) Class Driver	<code>.../usb_v2/usb_core/host/source/classes/cdc</code>
USB Host build projects	<code>.../usb_v2/usb_core/host/build/<compiler>/usbh_mqx_twrk22f120m</code>
USB Host example applications	<code>.../usb_v2/example/host</code>
USB Device Drivers Source Code and Examples	<code><install_dir>/usb_v2/usb_core/device/...</code>
USB Device source code	<code>.../usb_v2/usb_core/device/source</code>

USB Device build projects	.../usb_v2/usb_core/device/build/<compiler>/usbd_mqx_twrk22f120m
USB Device example applications	.../usb_v2/example/device
USB OTG Drivers Source Code and Examples	<install_dir>/usb_v2/usb_core/otg/...
USB OTG source code	.../usb_v2/usb_core/otg/source
USB OTG build projects	.../usb_v2/usb_core/otg/build/<compiler>/usbd_mqx_twrk22f120m
USB OTG example applications	.../usb_v2/example/otg
RTCS Source Code and Examples	<install_dir>/rtcs/...
RTCS source code	.../rtcs/source
RTCS build projects	.../rtcs/build/<compiler>/rtcs_twrk22f120m
Shell Library Source Code	<install_dir>/shell/...
Shell source code	.../shell/source
Shell build projects	.../shell/build/<compiler>/shell_twrk22f120m
PC Host Tools	<install_dir>/tools
TFS Make Utility	.../tools/mktfs.exe
Check for Latest Version tool	.../tools/webchk.exe
Documentation	<install_dir>/doc
User Guides and Reference Manuals for MQX RTOS, MFS, RTCS, IO Drivers, USB, etc.	.../doc

3 Installation Instructions

3.1 Installation guide

Run the TWR-K22F120M package installer and proceed according to instructions. This package can be used independently of the current MQX RTOS 4.1.0 folder.

3.1.1 Build procedure

For build procedures, see the *Getting Started with Freescale MQX™ RTOS (MQXGSRTOS)*.

3.1.2 Default jumper settings

These are the default jumper settings for TWR-K22F120M standalone operation:

- J18, J37, J36, J10, J7, J9, J17, J12, J15, J28, J26 on
- J21, J13, J11, J38, J34, J33 off
- J29, J30, J35 on position 2-3
- J27, J19, J22 on position 1-2

- J16 1-2, 3-4, 5-6, 7-8

3.1.3 Important jumper settings

For basic operations, ensure that the following jumper settings are applied:

- For USB:
 - J4 1-2: enables the P3V3_VOUT.
 - J26 1-2: enables 5V VBUS for the Host mode.

For TWR-K22F120M board rev. A:

- J27 1-2: uses the mini USB receptacle on the TWR-SER board.
- J27 2-3: uses the micro USB receptacle on the TWR-K22F120M board.

For TWR-K22F120M board rev. B or later:

- J27 1-2: uses the micro USB receptacle on the TWR-K22F120M board.
- J27 2-3: uses the mini USB receptacle on the TWR-SER board.

3.1.4 Board-specific build targets

Internal Flash (Debug and Release): These targets enable building applications suitable for booting the system from the Internal Flash memory. After reset, the code is executed from the Internal Flash.

4 Other Notes

4.1 Keil (Uv4) patch

Because the Keil version 5.00 does not support the K22F120M 512R device, a patch is required for this device. Select the J-LINK/J-Trace Cortex as the debug tool on the **Debug** tab of the **Options for Target** window.

1. Add the target MKXX 512kB Prog Flash to the J_LINK/J-Trace driver setting.
2. In the **Operating system** text box of the **Target** tab, select **Freescale MQX**, and then click **OK**.

4.2 Lwgpio example

The lwgpio example has been moved to the gpio directory. The old POSIX IO GPIO example was removed, because the driver is no longer supported.

4.3 RTCS Library

RTCS files from the `/rtcs/source` directory are built into a static library. For instance, when the SPI-based Wi-Fi solution is used, the RTCS library enables the application to provide and consume network services of the TCP/IP protocol family.

5 Known Issues

- Because of the poor clock accuracy of CSTCE8M00G55-R0 on the TWR-K22F120M board, there is noise when the audio example (including USB audio example) is running.
- USB
 - The installation folder of the GCC Tool Chain needs to be modified to the correct path manually by the customer. Otherwise, the GCC tool chain cannot work. For detailed information, see the *Freescale MQX USB Stack for TWRK22F120M512R GA User's Guide* (USBTWRK22F51212RUG).
 - The GCC Tool Chain is only verified on the Windows 7 system, and it is not verified on any other systems.
 - The external power supply of a USB hub must be provided before a USB hub can be used.
