MATTER

A unified IP-based protocol to securely and robustly connect smart devices with each other, regardless of brand, and across smart home ecosystems

- Bring **interoperability** in Smart Home Ecosystem
- **Simplify** development for “things”
- Increase **compatibility** for consumers
- Ensure **security** and privacy
- Create a truly smarter home

[Build with Matter](#)

[NXP for Matter](#)

Led by global brands

And > 200 other companies!

NXP Leadership for Matter

- **Leadership in developing IoT standards**

- Networks: Thread Group, Connectivity Standards Alliance (CSA), Wi-Fi Alliance
- Connectivity: NFC Forum, FiRa, Bluetooth SIG
- Board-level members of Thread Group, CSA and Wi-Fi Alliance, NFC Forum and FiRa

- **Deep experience in open-source projects**

- Contributing to Matter and OpenThread repositories

- **Matter contribution areas**

- Security, platform, certification and marketing
- Border Router
- Specification and source code

- **Comprehensive Matter solutions**

- True one-stop-shop
 - Uses breadth of portfolio for compute, connectivity and security
 - MPU, MCU, Wi-Fi, BT, 802.15.4, NFC, UWB, SE, Sensors
- Flexibility to support all use cases

- **Worldwide team**

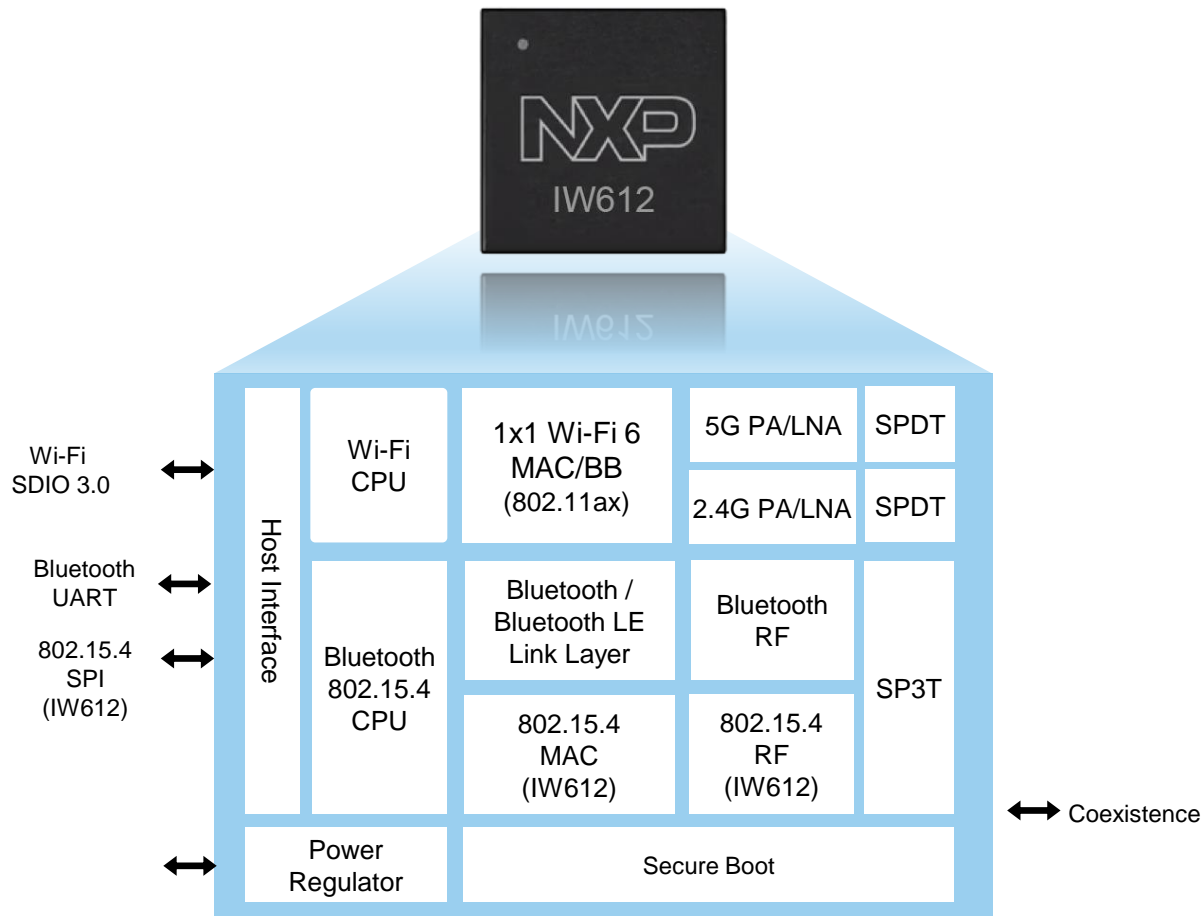

INTRODUCING INDUSTRY'S FIRST TRI-RADIO SOC – IW612

- **Industry's first Secure Tri-Radio monolithic solution**
 - Latest Wi-Fi 6, BT/Bluetooth LE 5.2 and 802.15.4 standards
 - Designed for Smart Home: Border routers (gateways)/bridges/hubs
 - Ideal for Matter—standardizing local control and enablement across ecosystems (regardless of cloud connectivity)
- **Advanced Coexistence**
 - Flexible internal coexistence for multi-radio operation designed specifically to be market leading across a broad range of key target applications
 - Additional support for external radios (UWB, 802.15.4, LTE, etc.)
- **NXP Security**
 - Leverage NXP security IP and industry leadership
 - Eases customers concerns devices will be compromised once deployed
- **NXP Microprocessor and Microcontroller IP and Broad Market Portfolio**
 - Eliminates need for customers to develop and integrate complex host operating systems and drivers
 - Resonating with market and customers
 - Single source for major components in design
- **System Cost Savings**
 - Reduced bill-of-materials and footprint – Integrated radios, LNA, high-power PAs
 - Simplifies complex RF design
 - Fewer components to procure

A CLOSER LOOK

1x1 Dual-Band Wi-Fi 6 + Bluetooth 5.2 + 802.15.4 optimized for IoT and Industrial Applications

Key Radio Features

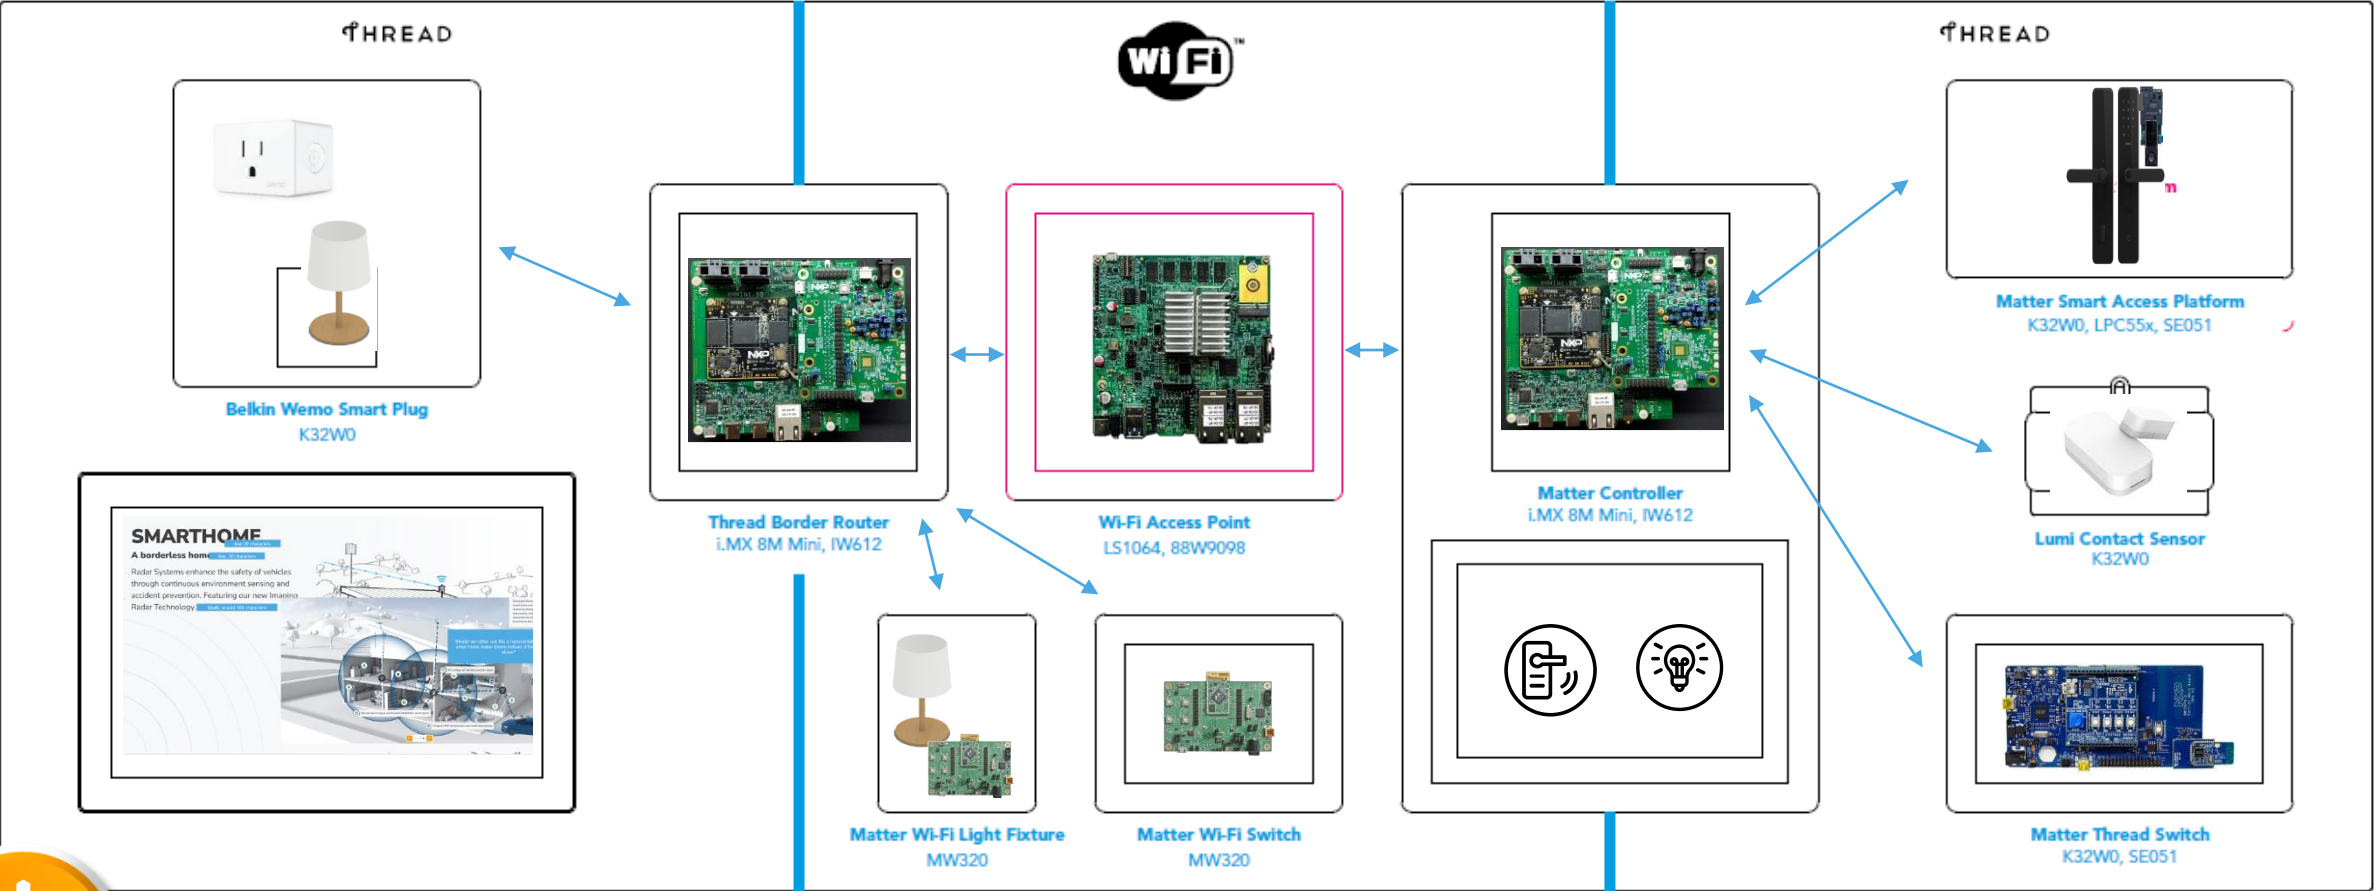

- **Wi-Fi 6**
 - 1x1 SISO 2.4 GHz / 5 GHz 802.11 a/b/g/n/ax
 - UL/DL OFDMA, STA UL MU-MIMO Tx and DL MU-MIMO Rx
 - 1024 QAM, 20/40/80 MHz channels, Peak Data Rate: 480 Mbps
 - 2.4 GHz Tx @ 21 dBm; 5 GHz Tx @ 20 dBm
 - 802.11ax extended range (ER), dual carrier modulation (DCM), target wait time (TWT)
 - WPA3 security with hardware encryption engines
 - Integrated PA, LNA and T/R switches
- **Bluetooth & Bluetooth Low Energy 5.2 with up to +20 dBm output power**
 - Class 1 and Class 2
 - High speed, long range, advertising extensions
 - Isochronous channels supporting LE Audio
 - Support for 2 wideband speech (WBS) links
- **802.15.4 supporting Thread with up to +20 dBm output power**
- **Support for Matter over Wi-Fi and Matter over Thread**
- **Advanced internal and external coexistence design for multi-radio operation**
- **Single or dual antenna configurations**
- **Lowest RBOM cost with integrated PAs, LNAs, switches and power mgmt.**
- **Security**
 - Secure boot, debug and firmware update, secure key generation and management, HW crypto, TRNG, PUF, OTP and lifecycle management
- **Android, Linux and FreeRTOS**

General Features

- **9 mm x 9 mm, 0.5p 116-pin HVQFN**
- **4.96 mm x 4.385 mm, 0.3p 140-pin WLCSP**
- **Supply voltages: 3.3V & 1.8V**
- **Operating temperatures**
 - Commercial: 0 to +70°C
 - Industrial: -40 to +85°C

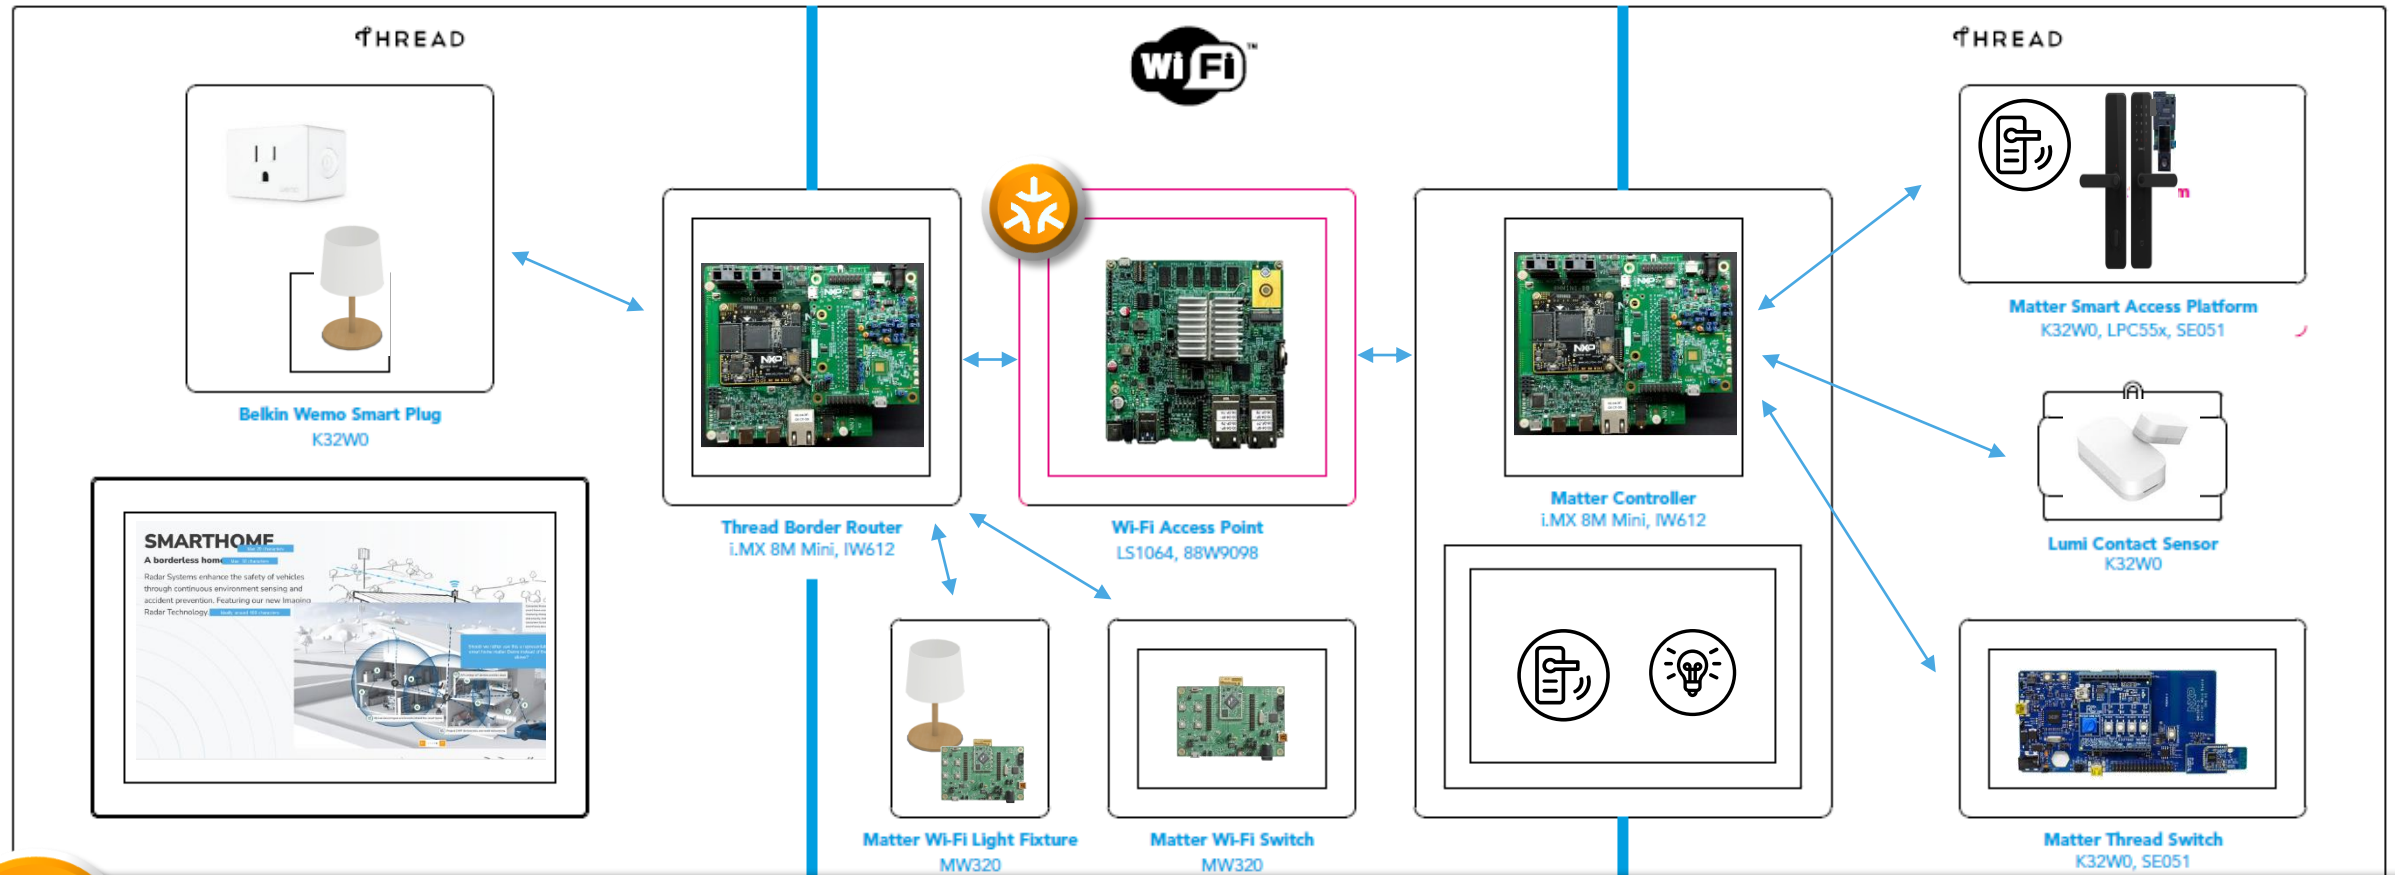

NXP SMART HOME DEMONSTRATION AT CES 2022

END-TO-END SOLUTIONS FOR SEAMLESS SMART HOME INTEROPERABILITY

NXP SMART HOME DEMONSTRATION AT CES 2022

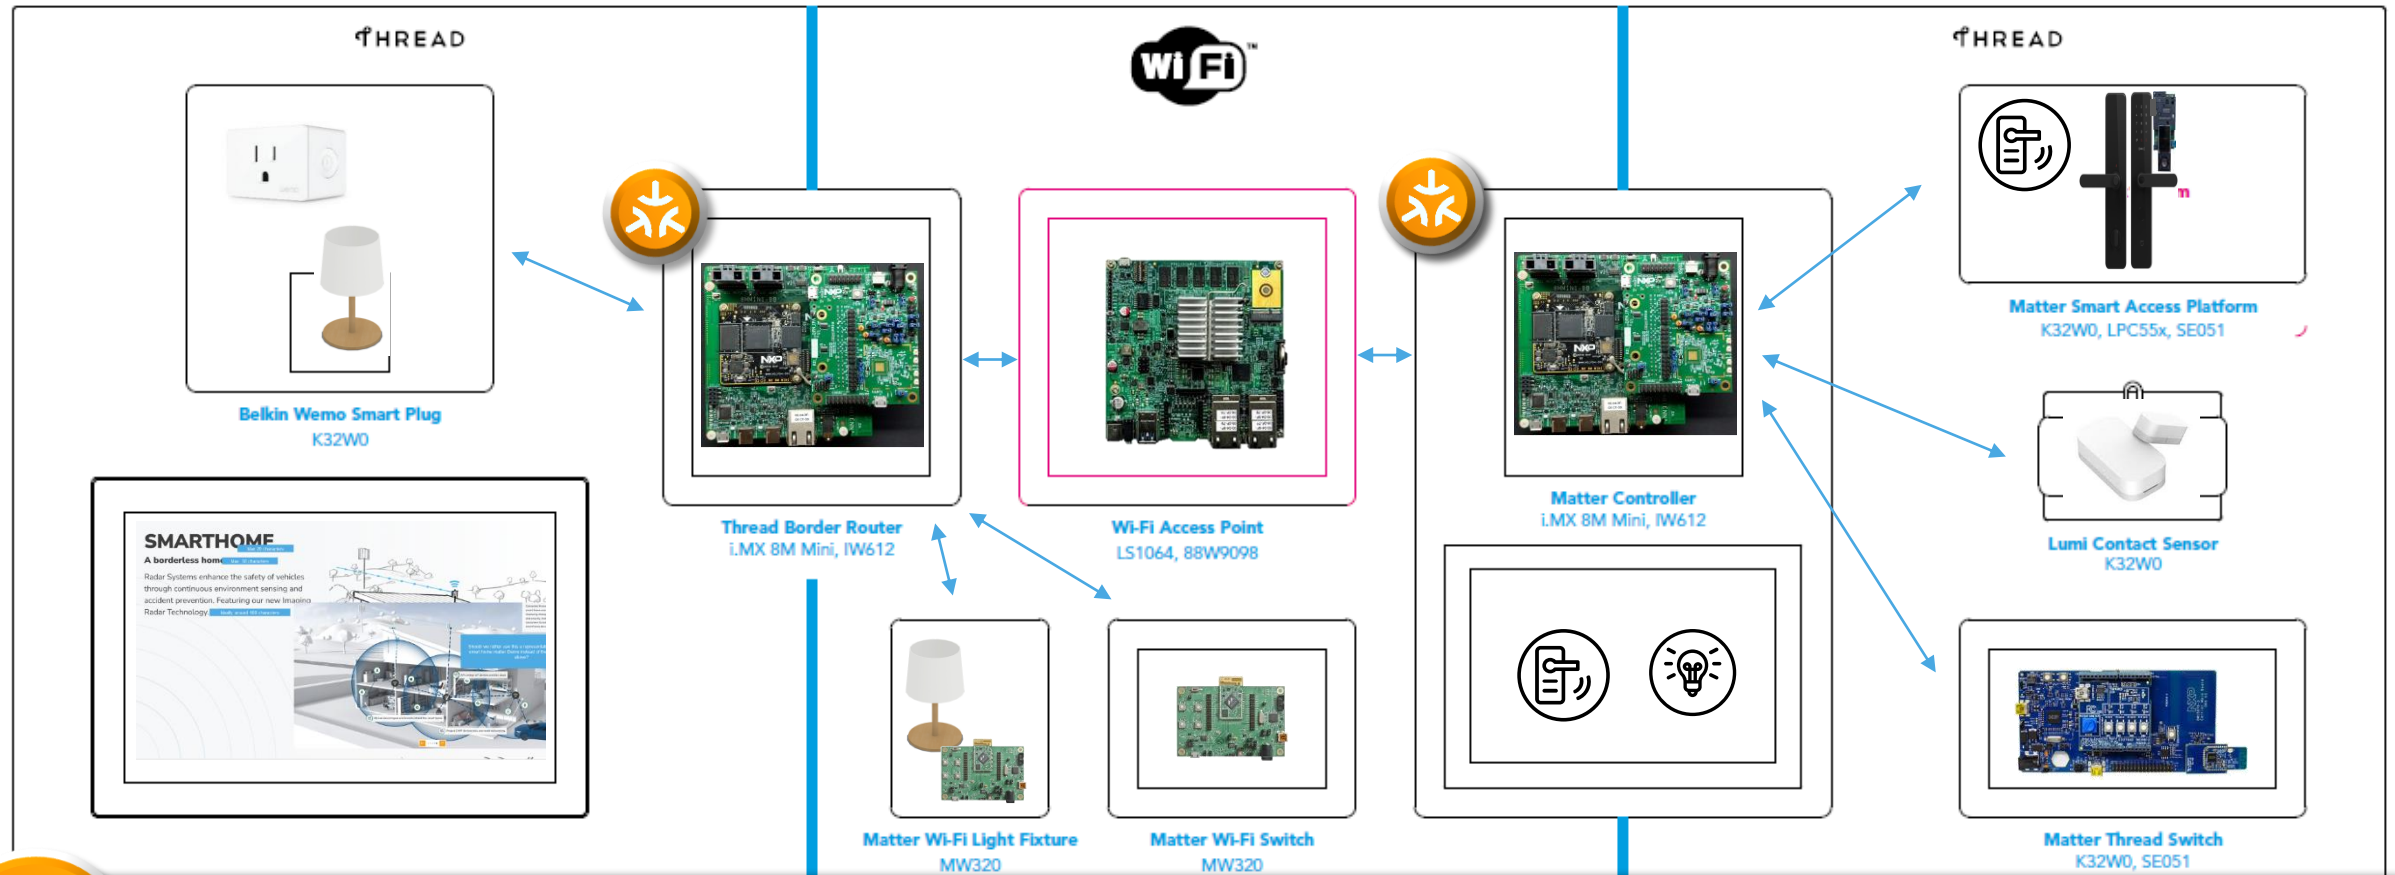

END-TO-END SOLUTIONS FOR SEAMLESS SMART HOME INTEROPERABILITY

Access point for remote control/monitoring of smart home
and firmware updates via cloud

NXP SMART HOME DEMONSTRATION AT CES 2022

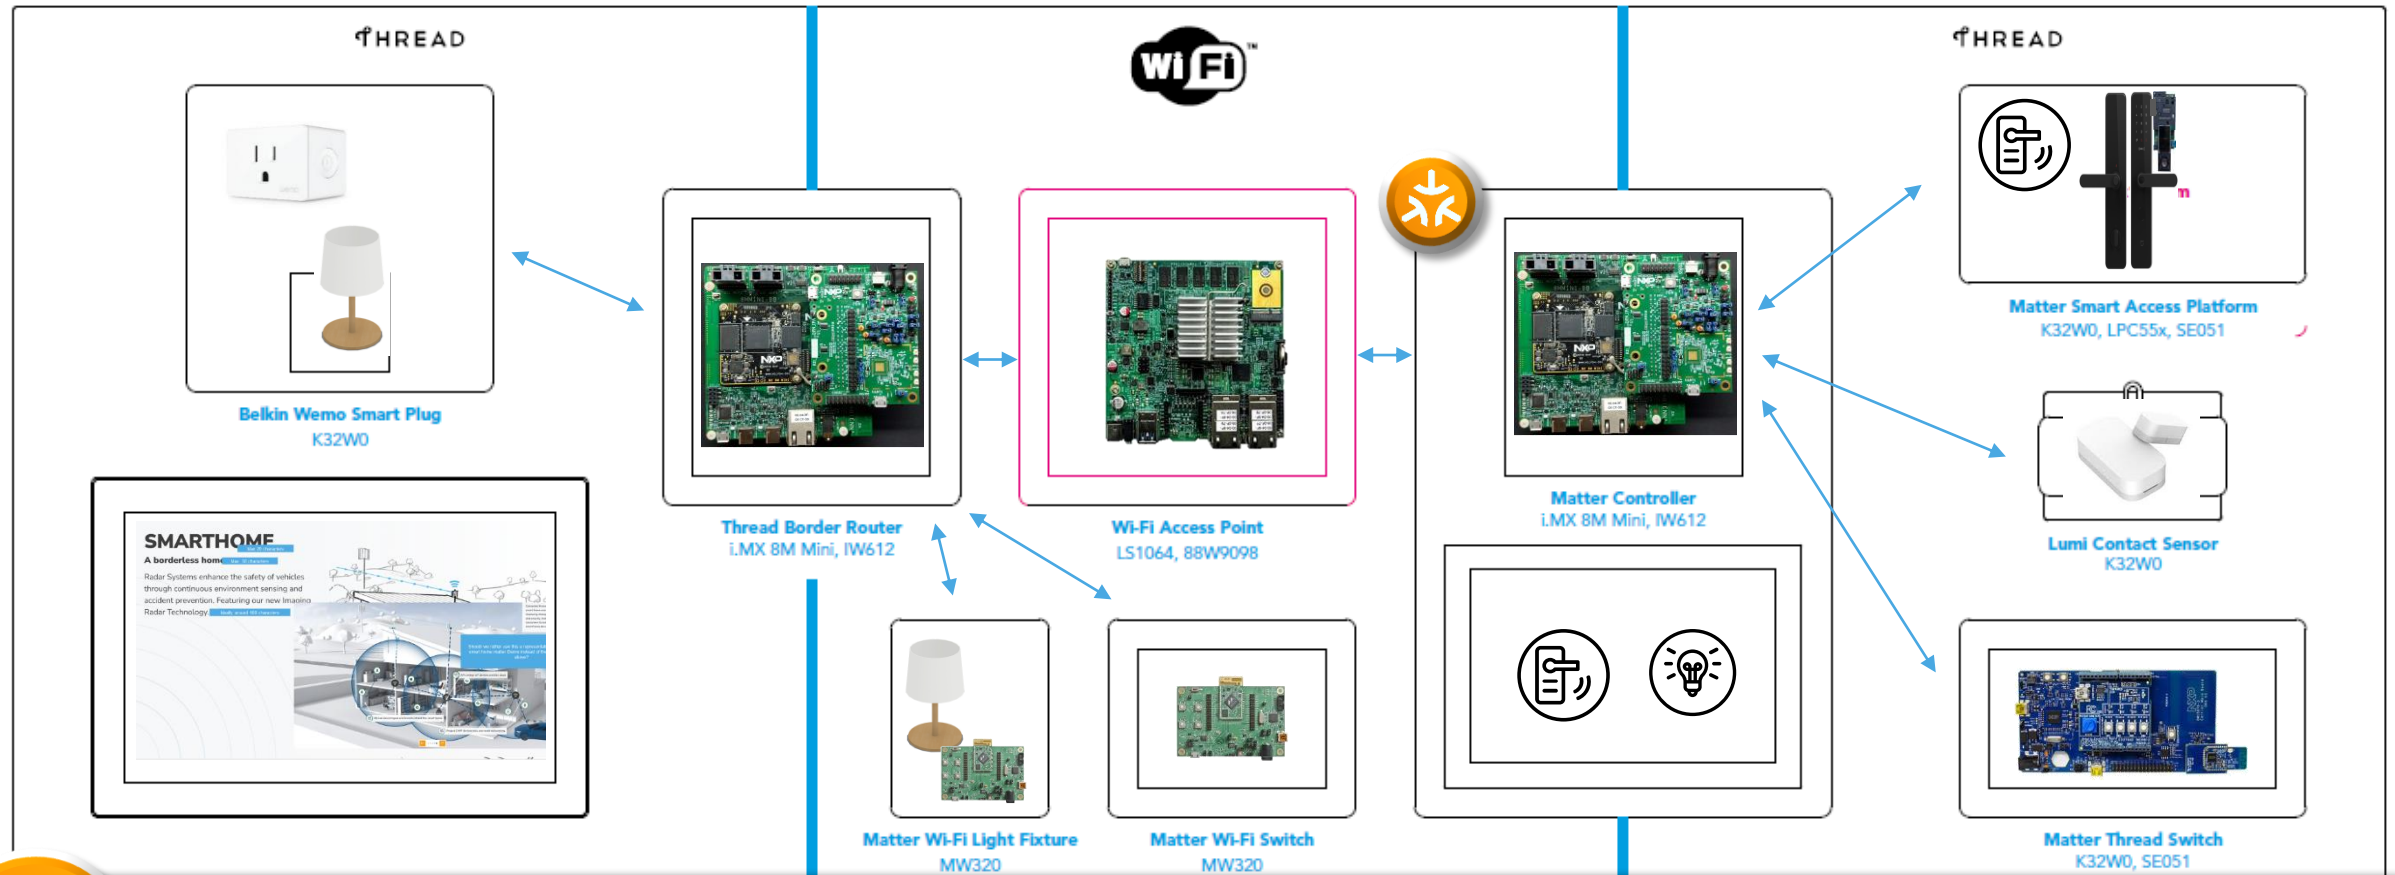

END-TO-END SOLUTIONS FOR SEAMLESS SMART HOME INTEROPERABILITY

Enables communication between Matter with Thread and Matter with Wi-Fi devices and to cloud via the access point

NXP SMART HOME DEMONSTRATION AT CES 2022

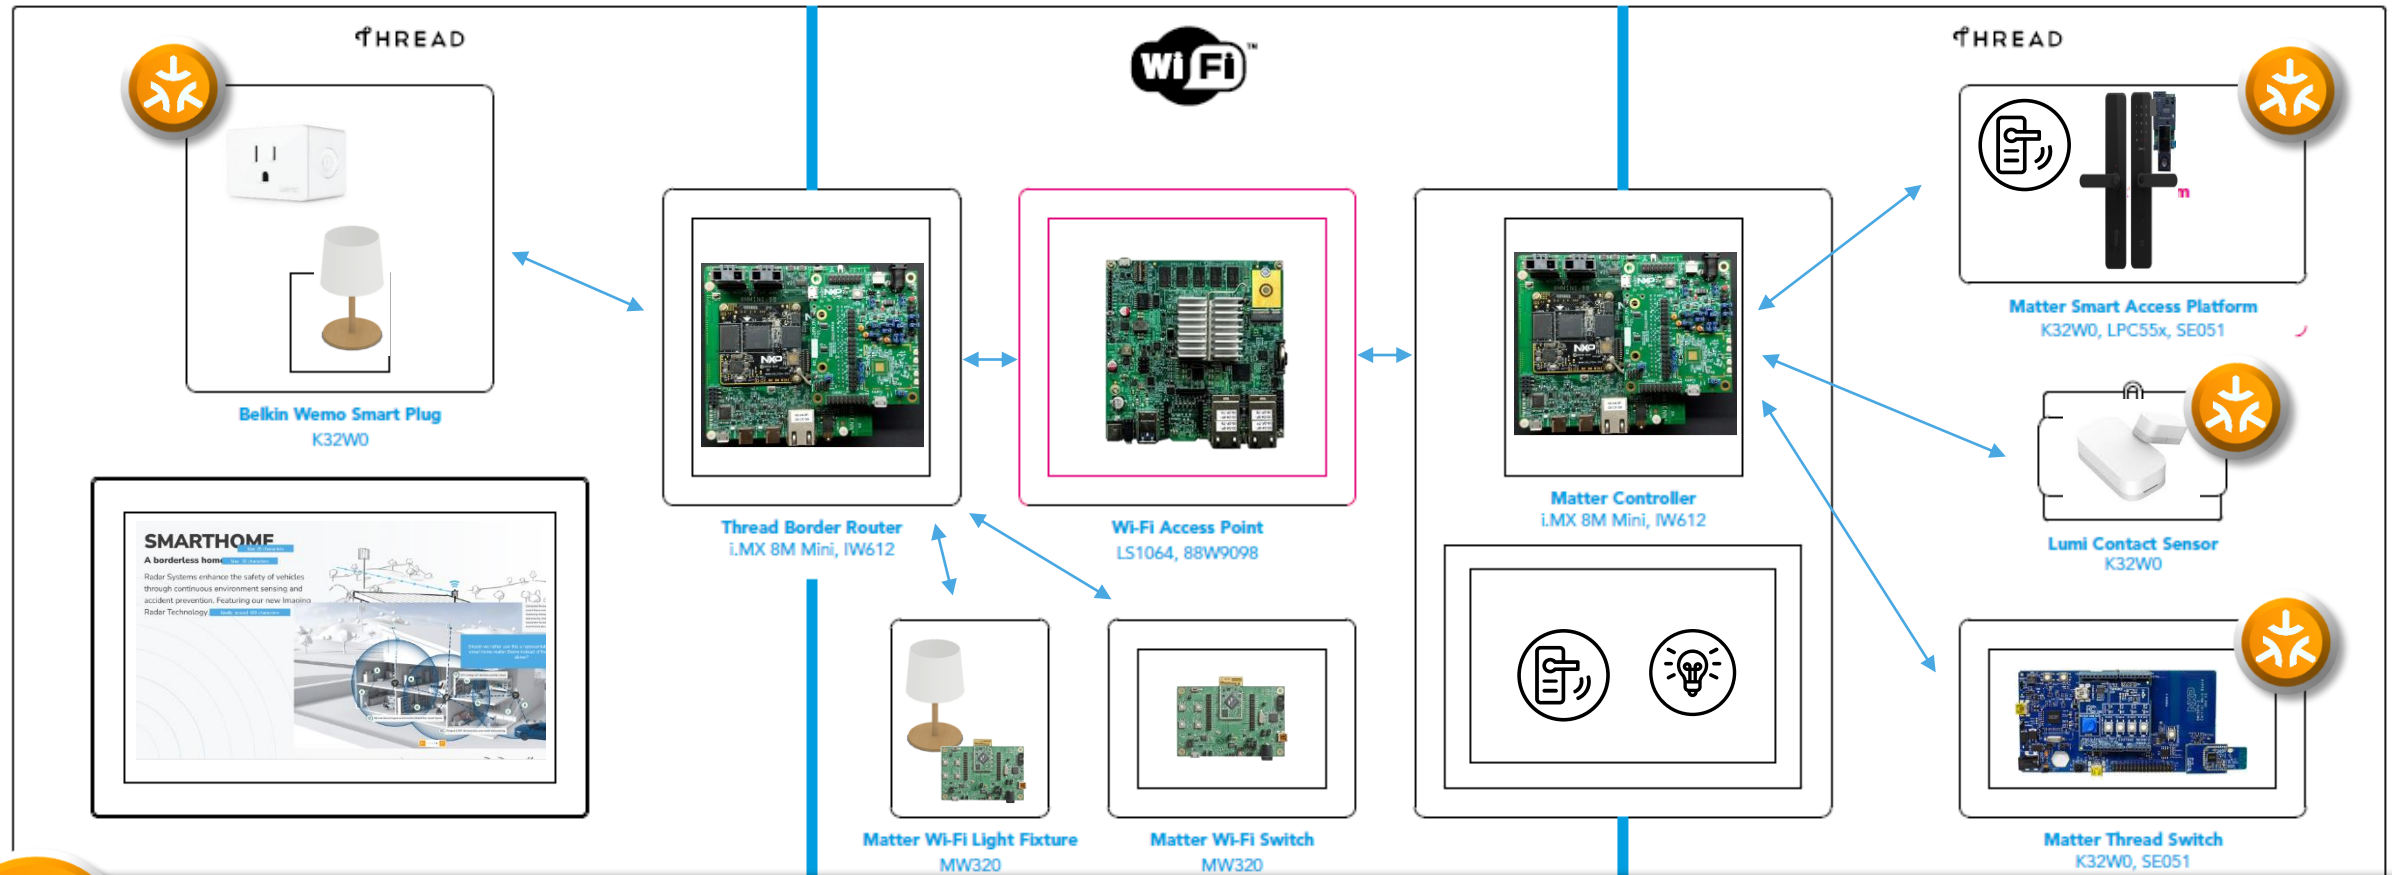

END-TO-END SOLUTIONS FOR SEAMLESS SMART HOME INTEROPERABILITY

Provisions new Matter devices onto the local network and can universally communicate with any device within the network

NXP SMART HOME DEMONSTRATION AT CES 2022

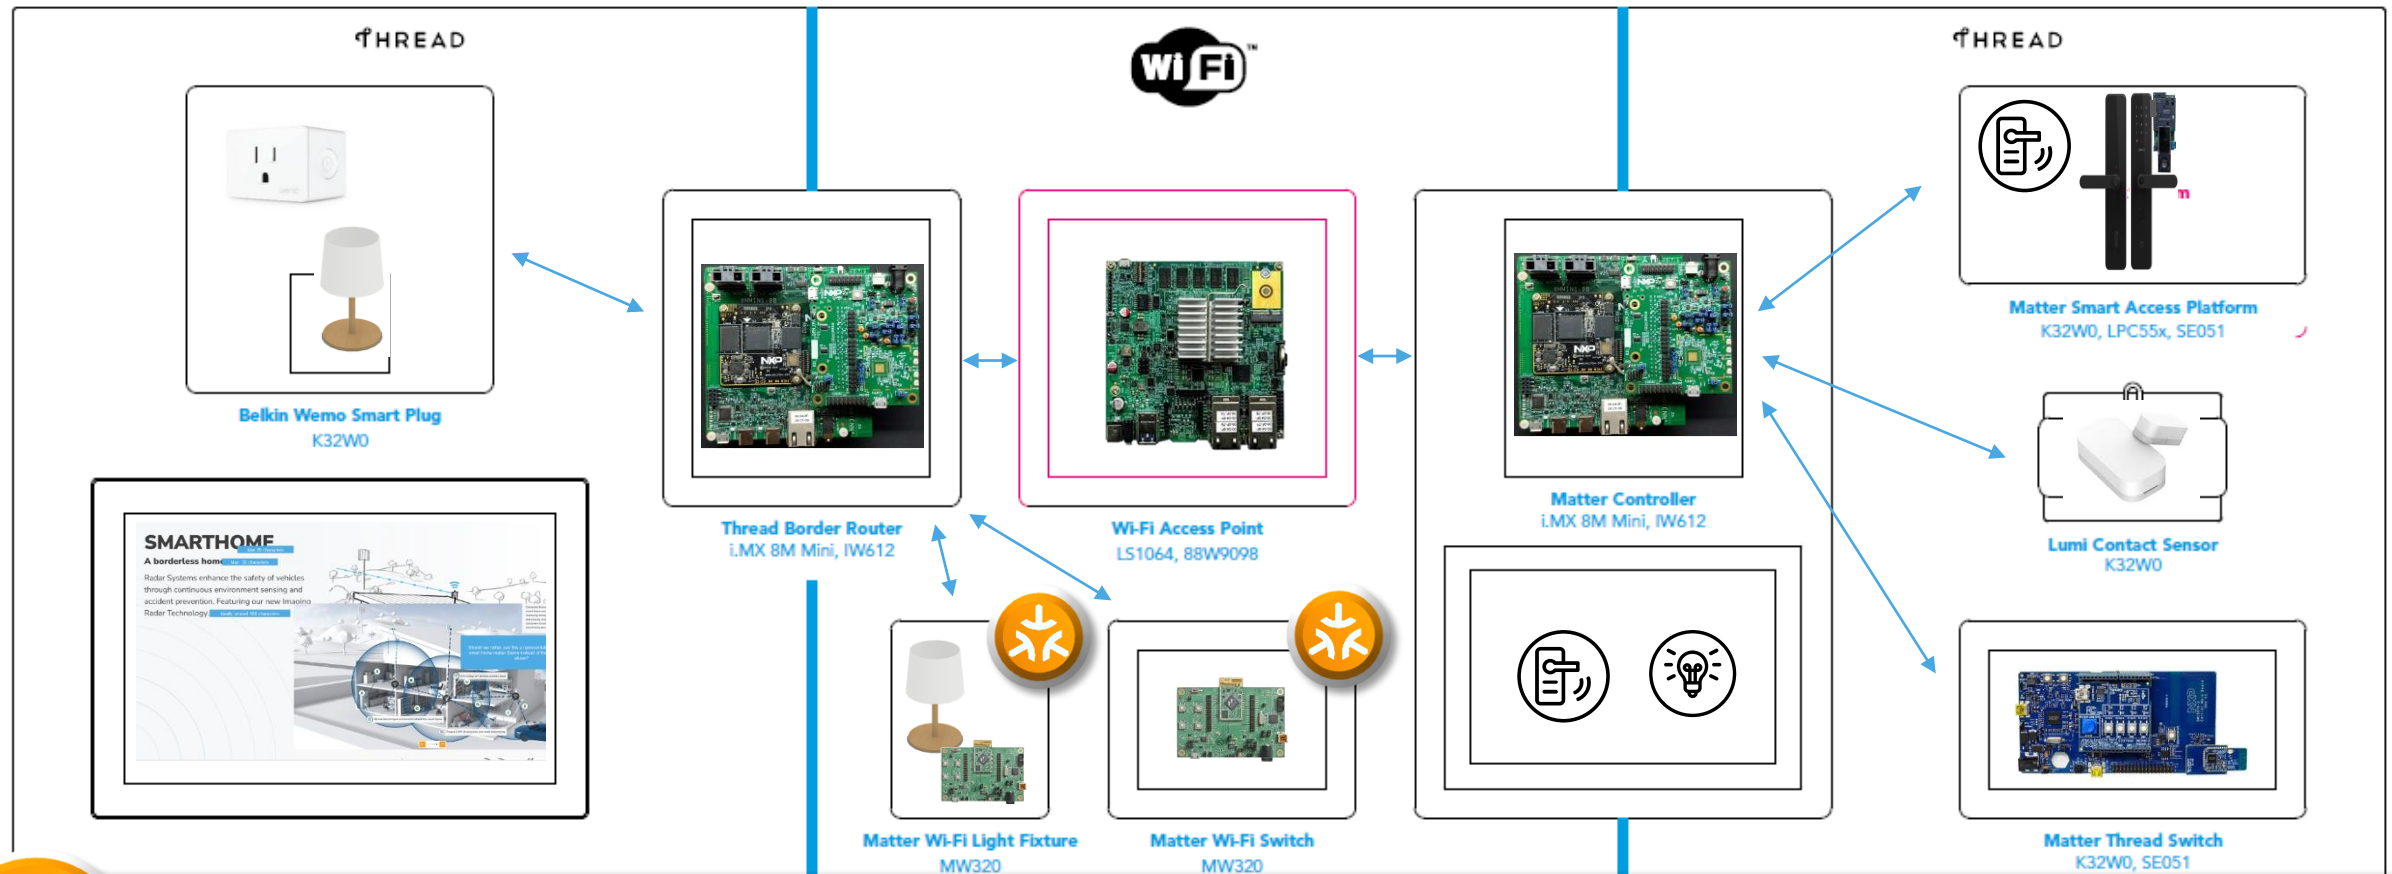

END-TO-END SOLUTIONS FOR SEAMLESS SMART HOME INTEROPERABILITY

Application devices for controlling and monitoring the smart home via Thread network, such as smart plugs, switches, lights, door locks, security sensors, etc

NXP SMART HOME DEMONSTRATION AT CES 2022

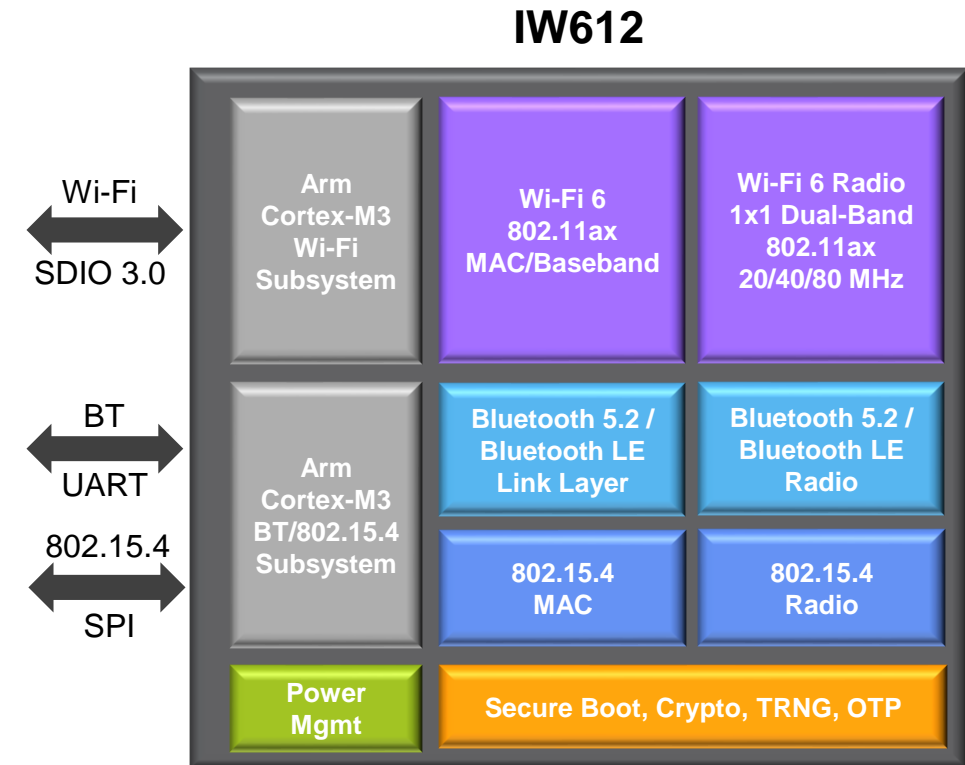

END-TO-END SOLUTIONS FOR SEAMLESS SMART HOME INTEROPERABILITY

Application devices for controlling and monitoring the smart home via Wi-Fi network, such as switches, lights, cameras, doorbells, smart speakers, etc

IW612 OVERVIEW AND VALUE PROPOSITION

IW612 1x1 DB Wi-Fi 6 + Bluetooth 5.2 + 802.15.4	Value
Wi-Fi 6: Performance, Efficiency, Power	Spectrum efficient, robust, future-proof
Wi-Fi 6 IoT features supported	Higher throughput, better network efficiency, lower latency, improved range
Bluetooth/Bluetooth Low Energy 5.2	Higher speed, longer range, LE audio, A2DP, HFP
802.15.4	Supports Thread ecosystems
Matter (formerly Project CHIP)	Standardized Thread and Wi-Fi application layer
Simultaneous Wi-Fi + BT + 802.15.4 receive	Reduced latency
Simultaneous or arbitrated Wi-Fi + BT/802.15.4 transmit	Supports single and dual antenna designs
Advanced internal + external radio coexistence	Best-in-class hardware coexistence arbitration
High power +20 dBm PA for Bluetooth and 802.15.4	<ul style="list-style-type: none"> - Eliminates need of costly external PAs - Reduced board area
Security	<ul style="list-style-type: none"> - Secure boot, debug and secure firmware update - Secure key generation and management - Hardware cryptography - Lifecycle management
Reduced BOM	Reduced cost and PCB area, simplify design and manufacturing

IW612 & MATTER: SIMPLIFYING HOSTED REFERENCE PLATFORMS

HOSTED: MCU HOST

HOSTED: MPU HOST

IW612 Features

TODAY

TOMORROW

- True single-chip Thread Border Router
- Higher security / Fewer devices equates to lower security risk
- Run Matter over Wi-Fi and Matter over Thread from same device
- On-chip built-in advanced hardware co-existence
- Simplifies design and development
- Smaller form factor, lower cost
- On-chip PAs provide output power up to +20 dBm for all radios (Wi-Fi, BLE, and 802.15.4)
- External PA not needed
- Reduces supply chain issues
- Fewer chips to procure

LEADING WI-FI POSITIONS

Smart Home

- Border Routers
- In-home Display Hubs/Assistants
- Voice Assistants
- Thermostats
- Smart Doorbells
- Garage Door Controller
- Speakers/Soundbars
- Robotic Cleaners

Industrial

- Building & Energy Management
- Location Services
- Condition based Monitoring
- Sensor Networks
- Healthcare

Automotive

- In-Vehicle Infotainment (IVI)
- Rear Seat Entertainment
- Motorcycles (IVI/Rider Comms)
- Telematics (TCU)

SUMMARY

- Industry's first secure Tri-Radio monolithic solution
- Advanced Coexistence
- NXP Security
- NXP Microprocessor and Microcontroller IP and Broad Market Portfolio
- System Cost Savings
