NXP Supplier Code of Conduct

A. Introduction

NXP is a company with a strong commitment to sustainability. NXP encourages its suppliers to join NXP in this commitment, based on a shared set of values and principles.

NXP pursues mutually beneficial relationships with its suppliers and contractors ("Suppliers") and seeks to award business to those Suppliers that are committed to act fairly and with integrity towards their stakeholders, to observing the applicable rules of law, and to supporting and respecting internationally proclaimed human rights.

NXP is committed to ensuring that working conditions in NXP’s supply chain are safe, that workers are treated with respect and dignity, and that manufacturing processes are environmentally responsible.

NXP’s Suppliers will commit, in all their activities, to operate in full compliance with the laws, rules, and regulations of the countries in which they operate. Beyond this, Suppliers will comply with the NXP Supplier Code of Conduct ("Code") using the management systems described in this document.

The Code embodies the principles outlined in the Responsible Business Alliance (formerly the Electronic Industry Citizenship Coalition) ("RBA") Code of Conduct, Version 6.0. RBA member companies, including NXP, are committed to support the rights and wellbeing of workers and communities worldwide affected by the global electronics supply chain. The Code is also based upon the NXP Code of Conduct (COBC). In some places, this Code is more detailed than the RBA Code of Conduct or the NXP Code of Conduct to provide clarity and to incorporate the possibility to assess Supplier’s compliance with the Code.

NXP suppliers shall comply with the requirements in this Code, and require its own suppliers do the same. NXP may visit (and/or have external monitors visit) Supplier facilities to assess compliance with this Code. Violation of this Code may result in an immediate termination of the relationship with NXP. Additionally, any such violation may result in legal action.

Recognized standards, such as the Universal Declaration of Human Rights (UDHR), standards issued by organizations such as the International Labor Organization (ILO), Social Accountability International (SAI), and the Ethical Trading Initiative (ETI), have been used as references in preparing this Code and may be useful sources of additional information (see Section 7). NXP extends the Code by maintaining a series of detailed Standards that clarify its expectations for compliance.

This Code is not intended to create new and additional third-party rights, including for employees.
B. Standards for Labour and Human Rights

NXP is committed to upholding the human rights of workers and treating them with dignity and respect as understood by the international community. This applies to all workers including temporary, migrant, student, contract, direct employees, and any other type of worker.

The labor standards are as follows:

1. Freely Chosen Employment and Prevention of Involuntary Labor and Human Trafficking

Forced, bonded (including debt bondage) or indentured labor, involuntary or exploitative prison labor, slavery or trafficking of persons shall not be used. This includes transporting, harboring, recruiting, transferring or receiving persons by means of threat, force, coercion, abduction or fraud for labor or services. There shall be no unreasonable restrictions on workers’ freedom of movement in the facility in addition to unreasonable restrictions on entering or exiting company-provided facilities. As part of the hiring process, workers must be provided with a written employment agreement in a language understood by the worker that contains a description of terms and conditions of employment prior to the worker departing from his or her country of origin and there shall be no substitution or change[s] allowed in the employment agreement upon arrival in the receiving country unless these changes are made to meet local law and provide equal or better terms.

All work must be voluntary and workers shall be free to leave work at any time or terminate their employment without any penalty if reasonable notice is given. Suppliers and agents may not hold or otherwise destroy, conceal, confiscate or deny access by employees to employees’ identity or immigration documents, such as government-issued identification, passports or work permits, unless the holding of work permits is required by law. Workers shall not be required to pay employers’ or agents’ recruitment fees or other related fees for their employment. Such fees and expenses include, but are not limited to expenses associated with recruitment, processing, or placement of workers. If any such fees are found to have been paid by workers, Supplier shall be responsible that such fees shall be repaid to the worker.

2. Child Labor Avoidance and Young Workers

Child labor is not allowed in any stage of manufacturing. The term “child” refers to any person under the age of 15, under the age for completing compulsory education, or under the minimum age for employment in the country, whichever is greater. The use of legitimate workplace apprenticeship programs, which comply with all laws and regulations, is supported. Workers under the age of 18 (Young Workers) shall not perform work that is likely to jeopardize their health or safety, including nightshift and overtime. Supplier shall ensure proper management of student workers through proper maintenance of student records, rigorous due diligence of educational partners, and protection of students’ rights in accordance with applicable law and regulations. Supplier shall provide appropriate support and training to all student workers. In the absence of local law, the wage rate for student workers, interns and apprentices shall be at least the same wage rate as other entry-level workers performing equal or similar tasks.
3. **Working Hours**  
Studies of business practices clearly link worker strain to reduced productivity, increased turnover, and increased injury and illness. Working hours are not to exceed the maximum set by local law. Further, a work week shall not be more than 60 hours per week, including overtime, except in emergency or unusual situations. Workers shall have at least one scheduled day off every seven days and not work more than six consecutive days. All overtime shall be voluntary.

4. **Wages and Benefits**  
Compensation paid to workers shall comply with all applicable wage laws, including those relating to minimum wages, overtime hours, and legally mandated benefits. In compliance with local laws, workers shall be compensated for overtime at pay rates greater than regular hourly rates. Deductions from wages as a disciplinary measure shall not be permitted. Suppliers shall offer vacation time, leave periods, and holidays consistent with applicable laws and regulations. Suppliers shall pay workers in a timely manner. For each pay period, workers shall be provided with a timely and understandable wage statement that includes sufficient information to verify accurate compensation for work performed. All use of temporary, dispatch and outsourced labor will be within the limits of the local law.

5. **Humane Treatment**  
There is to be no harsh or inhumane treatment of workers including any sexual harassment, sexual abuse, corporal punishment, mental or physical coercion, or verbal abuse of workers; nor is there to be the threat of any such treatment. Disciplinary policies and procedures in support of these requirements shall be clearly defined and communicated to workers.

6. **Non-Discrimination**  
Suppliers shall be committed to a workforce free of harassment and unlawful discrimination. Companies shall not engage in discrimination based on race, colour, age, gender, sexual orientation, gender identity and expression, ethnicity or national origin, disability, pregnancy, religion, political affiliation, union membership, covered veteran status, protected genetic information or marital status in hiring and employment practices such as wages, promotions, rewards, and access to training. Workers shall be provided with reasonable accommodation for religious practices. In addition, workers or potential workers should not be subjected to medical tests or physical exams that could be used in a discriminatory way.
7. **Freedom of Association and Collective Bargaining**

In conformance with local law, participants shall respect the right of all workers to form and join trade unions of their own choosing, to bargain collectively and to engage in peaceful assembly as well as respect the right of workers to refrain from such activities. Workers shall be able to openly communicate and share ideas, concerns, and grievances with management regarding working conditions and management practices without fear of reprisal, intimidation, or harassment.

Supplier shall respect – within the framework of laws, regulations, and prevailing labor relations and employment practices – the right of its employees to be represented by labor unions and other employee organizations. Supplier will engage in negotiations, either on its own behalf or through employers’ associations, with a view to reaching agreement on employment conditions.

8. **Diversity**

NXP furthers innovation and accelerates growth by fostering inclusive teams of diverse employees and recognizes that teams’ varied backgrounds, experiences, and ideas are critical to NXP’s success. Suppliers (agents or search companies) engaged by NXP in recruiting employees for NXP shall therefore make every effort to present a diverse list of candidates for each position, without regard to race, gender, age, or other factors unrelated to their ability to perform in the position. These Suppliers will document their efforts and provide evidence to NXP upon NXP’s request.
C. Standards for Health and Safety

NXP recognizes that in addition to minimizing the incidence of work-related injury and illness, a safe and healthy work environment enhances the quality of products and services, the consistency of production, and worker retention and morale. NXP also recognizes that ongoing worker input and education are essential to identifying and solving health and safety issues in the workplace.

The health and safety standards are as follows:

1. Occupational Safety
   Worker potential for exposure to safety hazards (e.g., chemical, electrical and other energy sources, fire, vehicles, and fall hazards) are to be identified and assessed, and controlled through proper design, engineering and administrative controls, preventative maintenance, and safe work procedures (including lockout/tag-out), and ongoing safety training. Where hazards cannot be adequately controlled by these means, workers are to be provided with appropriate, well-maintained, personal protective equipment and educational materials about risks to them associated with these hazards. Reasonable steps must also be taken to remove pregnant women/nursing mothers from working condition with high hazards, remove or reduce any workplace health and safety risks to pregnant women and nursing mothers including those associated with their work assignments, as well as include reasonable accommodations for nursing mothers. Workers shall not be disciplined for raising safety concerns and shall have the right to refuse unsafe working conditions without fear of reprisal until management adequately addresses their concerns.

2. Emergency Preparedness
   Potential emergency situations and events are to be identified and assessed, and their impact minimized, by implementing emergency plans and response procedures, including emergency reporting, employee notification and evacuation procedures, worker training and drills, appropriate fire detection and suppression equipment, clear and unobstructed egress, adequate exit facilities, and recovery plans. Such plans and procedures shall focus on minimizing harm to life, the environment and property.

3. Occupational Injury and Illness
   Procedures and systems are to be in place to prevent, manage, track, and report occupational injury and illness including provisions to encourage workers to report, classify and record injury and illness cases, provide necessary medical treatment, investigate cases and implement corrective actions to eliminate their causes, and facilitate return of workers to work.
4. **Industrial Hygiene**
Worker exposure to chemical, biological and physical agents is to be identified, evaluated, and controlled according to the hierarchy of controls. Potential hazards are to be eliminated or controlled through proper design, engineering and administrative controls. When hazards cannot be adequately controlled by such means, workers are to be provided with and use appropriate, well-maintained, personal protective equipment. Protective programs shall include educational materials about the risks associated with these hazards.

5. **Physically Demanding Work**
Worker exposure to the hazards of physically demanding tasks -- including manual material handling and heavy or repetitive lifting, prolonged standing and highly repetitive or forceful assembly tasks -- is to be identified, evaluated, and controlled.

6. **Machine Safeguarding**
Production and other machinery shall be evaluated for safety hazards. Physical guards, interlocks, and barriers are to be provided and properly maintained where machinery presents an injury hazard to workers.

7. **Sanitation, Food, and Housing**
Workers are to be provided with ready access to clean toilet facilities, potable water, and sanitary food preparation, storage, and eating facilities. Worker dormitories, provided by the Supplier or a labor agent, are to be maintained to be clean and safe, and provided with appropriate emergency egress, hot water for bathing and showering, adequate lighting, heat and ventilation, individually secured accommodations for storing personal and valuable items, and reasonable personal space as well as reasonable entry and exit privileges.

8. **Health and Safety Communication**
Supplier shall provide workers with appropriate workplace health and safety information and training, in the language of the worker or in a language the worker can understand, for all identified workplace hazards that workers are exposed to, including but not limited to mechanical, electrical, chemical, fire, and physical hazards. Health and safety related information, including Safety Data Sheets, and warnings shall be clearly posted in the facility or placed in a location identifiable and accessible by workers. Training is provided to all workers prior to the beginning of work and regularly thereafter. Workers shall be encouraged to raise safety concerns.

9. **Worker Health and Safety Committees**
Suppliers are encouraged to initiate and support worker health and safety committees to enhance ongoing health and safety education and to encourage worker input regarding health and safety issues in the workplace.
D. Standards for Environment

NXP recognizes that environmental responsibility is integral to producing world-class products. In manufacturing operations, adverse effects on the community, the environment, and natural resources are to be minimized while safeguarding the health and safety of the public.

The environmental standards are as follows:

1. Environmental Permits and Reporting
   All required environmental permits, approvals, and registrations are to be obtained, maintained, and kept current, and their operational and reporting requirements are to be followed.

2. Pollution Prevention and Resource Reduction
   Emissions and discharges of pollutants and generation of waste are to be minimized or eliminated at the source or by practices such as adding pollution control equipment; modifying production, maintenance and facility processes; or by other means. The use of natural resources, including water, fossil fuels, minerals and virgin forest products, is to be conserved or by practices such as modifying production, maintenance and facility processes, materials substitution, re-use, conservation, recycling or other means.

3. Hazardous Substances
   Chemicals and other materials posing a hazard to humans or the environment are to be identified, labelled and managed to ensure their safe handling, movement, storage, use, recycling or reuse, and disposal.

4. Solid Waste
   Suppliers shall implement a systematic approach to identify, manage, reduce, and responsibly dispose of or recycle solid waste (non-hazardous).

5. Air Emissions
   Air emissions of volatile organic chemicals, aerosols, corrosives, particulates, ozone-depleting chemicals, and combustion by-products generated from operations are to be characterized, monitored, controlled, and treated as required by applicable laws and regulations prior to discharge. Suppliers shall conduct routine monitoring of the performance of its air emission control systems.
6. Materials Restrictions
Suppliers shall comply with any applicable law or regulation prohibiting or restricting the use or handling of specific substances in products and manufacturing, including labelling for recycling and disposal. Suppliers shall identify and manage substances that pose a hazard if released to the environment to ensure safe handling, movement, storage, recycling, reuse, and disposal.

Suppliers engaged in the manufacturing of materials that will be part of NXP's end products and Suppliers engaged in the manufacturing of NXP branded-products shall comply with NXP's responsible product requirements. Upon NXP's request, the Supplier shall provide NXP with full material content information and compliance test reports using NXP's reporting format.

7. Water Management
Supplier shall implement a water management program that documents, characterizes, and monitors water sources, use and discharge; seeks opportunities to conserve water; and controls channels of contamination. All wastewater is to be characterized, monitored, controlled, and treated as required by applicable laws and regulations prior to discharge or disposal. Participant shall conduct routine monitoring of the performance of its wastewater treatment and containment systems to ensure optimal performance and regulatory compliance. Upon NXP's request, Supplier shall participate in the CDP Water Disclosure and/or the RBA Environmental Reporting.

8. Energy Consumption and Greenhouse Gas Emissions
Energy consumption and all relevant Scope 1 and 2 greenhouse gas emissions are to be tracked and documented, at the facility and/or corporate level. Suppliers are to look for cost-effective methods to improve energy efficiency and to minimize their energy consumption and greenhouse gas emissions. Upon NXP's request, Supplier shall participate in the CDP Supply Chain Disclosure and/or the RBA Environmental Reporting.

9. Certification
Suppliers engaged in the manufacture of, or engaged in providing materials that will be part of NXP branded products shall have ISO14001 certification (or comparable), or a plan to become certified. Alternatively, the material suppliers must provide documented objective evidence of an operational environmental management system and demonstrate equivalency.
E. Standards for Business Ethics

Suppliers shall be committed to the highest standards of ethical conduct when dealing with workers, suppliers, and customers.

1. Business Integrity
The highest standards of integrity are to be upheld in all business interactions. Suppliers shall have a zero-tolerance policy to prohibit any and all forms of bribery, corruption, extortion, or embezzlement.

2. No Improper Advantage
Bribes or other means of obtaining undue or improper advantage are not to be promised, offered, authorized, given or accepted. This prohibition covers promising, offering, authorizing, giving or accepting anything of value, either directly or indirectly through a third party, in order to obtain or retain business, direct business to any person, or otherwise gain an improper advantage. Monitoring and enforcement procedures shall be implemented to ensure compliance with anti-corruption laws.

3. Disclosure of Information
All business dealings should be transparently performed and accurately reflected on Supplier’s business books and records. Information regarding labor, health and safety, environmental practices, business activities, structure, financial situation, or performance is to be disclosed in accordance with applicable regulations and prevailing industry practices.

Falsification of records or misrepresentation of conditions or practices in the supply chain is unacceptable.

4. Intellectual Property
Intellectual property rights are to be respected, and the transfer of technology and know-how is to be done in a manner that protects intellectual property rights; customer and supplier information is to be safeguarded.

5. Fair Business, Advertising and Competition
Standards of fair business, advertising, and competition are to be upheld.

6. Protection of Identity and Non-Retaliation
Suppliers shall maintain programs to ensure the confidentiality, anonymity and protection of supplier and worker whistleblowers, unless prohibited by law. Supplier shall prohibit retaliation against workers who participate in whistleblowing in good faith or who refuse an order that is in violation of the NXP Supplier Code of Conduct. Suppliers shall provide an anonymous complaint mechanism for workers to report workplace grievances in accordance with local laws and regulations. Supplier shall have a formal communication program to ensure that every employee is fully informed of and understands the policy of non-retaliation.
7. Responsible Sourcing of Minerals
Suppliers shall have a policy to reasonably assure that the minerals used for the products they manufacture does not directly or indirectly finance or benefit armed groups or contribute to serious human rights abuses in Conflict-Affected or High-Risk Areas. Suppliers shall exercise due-diligence on the source and chain of custody of these minerals in accordance with a recognized due diligence framework and shall make their due diligence measures available to NXP upon request.

8. Privacy
Suppliers shall commit to protecting the reasonable privacy expectations for personal information of everyone they do business with, including suppliers, customers, consumers, and employees. Suppliers are to comply with privacy and information security laws and regulatory requirements when personal information is collected, stored, processed, transmitted, and shared.
F. Standards for Management System

Suppliers shall adopt or establish a management system that is related to the content of this Code. The management system shall be designed to ensure: (a) compliance with applicable laws, regulations, and customer requirements related to the Supplier’s operations and products; (b) conformance to this Code; and (c) identification and mitigation of operational risks related to this Code. It shall also facilitate continual improvement.

The management system should contain the following elements:

1. **Company Commitment**
   Suppliers shall have corporate social and environmental responsibility policy statements, affirming Supplier’s commitment to compliance and continual improvement, and endorsed by executive management and posted in the facility in the local language or language(s) understood by all employees.

2. **Management Accountability and Responsibility**
   Supplier shall clearly identify senior executive and company representative[s] responsible for ensuring implementation of the management systems and associated programs. Senior management reviews the status of the management system on a regular basis.

3. **Legal and NXP Requirements**
   Suppliers shall have a process to identify, monitor, and understand applicable laws, regulations and customer requirements, including the requirements of this Code.

4. **Risk Assessment and Risk Management**
   Suppliers shall have a process to identify the legal compliance, environmental, health and safety, and labor practice and ethics risks associated with Supplier’s operations. Suppliers shall determine the relative significance for each risk and implement appropriate procedural and physical controls to control the identified risks and ensure regulatory compliance.

5. **Improvement Objectives**
   Suppliers shall have written performance objectives, targets, and implementation plans to improve the Supplier’s social and environmental performance, including a periodic assessment of Supplier’s performance in achieving those objectives.

6. **Training and Competencies**
   Suppliers shall have programs for training managers and workers to implement Supplier’s policies, procedures, and improvement objectives, and to meet applicable legal and regulatory requirements.
7. **Communication**  
Suppliers shall have a process for communicating clear and accurate information about Supplier’s policies, practices, expectations, and performance to workers, suppliers, and customers.

8. **Worker Feedback, Participation, and Grievance**  
Supplier shall have ongoing processes, including an effective grievance mechanism, to assess employees’ understanding of and obtain feedback on or violations against practices and conditions covered by this Code and to foster continuous improvement.

9. **Audits and Assessments**  
Suppliers shall perform periodic self-evaluations to ensure conformity to legal and regulatory requirements, the content of the Code, and customer contractual requirements relating to social and environmental responsibility.

10. **Corrective Action Process**  
Suppliers shall have a process for timely correction of deficiencies identified by internal or external assessments, inspections, investigations, and reviews.

11. **Documentation and Records**  
Suppliers shall create and maintain documents and records to ensure regulatory compliance and conformity to Suppliers’ requirements along with appropriate confidentiality to protect privacy.

12. **Supplier Responsibility**  
Suppliers shall have a process to communicate the NXP Supplier Code of Conduct or comparable requirements to their own, next-tier suppliers and to monitor supplier compliance to the requirements.
