

Dear User,

The embedded zip files contains both the documentation for the RTAI port of uCLinux for the MCF5407 ColdFire microprocessor, based on the M5407C3 evaluation board hardware and example C, make and header files. The source for this port is available for download at the links below -

<http://www.uclinux.org/ports/coldfire/uClinux-dist-20020927.tar.gz>

<http://www.aero.polimi.it/RTAI/rtai-24.1.8.tgz>

<http://www.uclinux.org/pub/uClinux/m68k-elf-tools/m68k-elf-tools-20011219.tar.gz>

As with all public domain open source software there is no implied warranty with the software detailed at the links above. This distribution is for use at the user's own risk.
